

11555 Edgerton Ave NE
Rockford, MI 49341

(616) 866-8287

CONGRATULATIONS! You have received your body art in a safe, clean environment.

Keep your tattoo bandaged for at least 15 minutes, but no longer than 2 hours. After removing the bandage, wash your tattoo with cold and soapy water, rinse well and blot dry. DO NOT re-bandage.

Apply a thin layer of A&D Ointment, Aquaphor, or Tattoo Goo for the first 3-4 days, 3 to 4 times a day. Put on and blot off.

After 4 days, it is safe to switch to a plain white hand lotion, we recommend Keri Lotion or Lubriderm Original. Use lotion as long as you like.

IF you do have an allergic reaction or develop an infection seek medical attention.

Things to avoid:

- ◇ It is normal for a tattoo to peel and flake. DO NOT pick at it!
- ◇ Avoid swimming, hot tubing, or soaking the tattoo for 2 weeks.
- ◇ Avoid sun exposure, tanning, and sunscreen for 2 weeks. After 2 weeks, sunscreen can then be applied, however tanning will shorten the longevity of the tattoo.

Following the aftercare instructions will help preserve the life of your new tattoo and can help ensure a safe healing process.

Thank you for choosing *Ace Tattoo* and remember to like us on facebook at ACE TATTOO.

Disclosure statement/Notice for filing complaints Public Act 149, which was enacted in Dec. of 2007, indicates that individuals shall not tattoo, brand or perform body piercings on another individual unless the tattooing, branding or body piercing occurs at a body art facility licensed by the Michigan Department of community Health. Body art facilities are required to be in compliance with the "Requirements for Body Art Facilities," which provide guidelines for safe and sanitary body art administration. As with any invasive procedure, body art may involved possible health risks. These risks may include, but are not limited to transmissions of blood borne diseases such as HIC, viral hepatitis, skin disorders, skin infections, and allergic reactions. In addition, persons with certain conditions including, but not limited to diabetes, hemophilia, or epilepsy are at a higher risk for complications and should consult a physician before undergoing a body art procedure. If you wish to file a complaint against a body art facility related to compliance with PA 149 or have concerns about potential health risks, please visit www.michigan.gov/bodyart.
